SAN JOSE SCALE.—We have a paper from the Department of Agriculture of the State of York certifying that our nurseries were examined on the 13th day of August, 1898, and found free from San Jose Scale and all other contagious plant diseases.

# Rochester Commercial Nurseries

ESTABLISHED 1830.

WM. S. LITTLE & CO.'S

SEMI-ANNUAL

## PRICE LIST

FALL, 1898.

### TERMS AND CONDITIONS OF SALE.

The prices quoted in this List are expected to apply only where the specified quantities are taken, except as follows strictly : *Where the order amounts to \$10 or over, five hundred will be supplied at thousand rate ; fifty at the hundred rate, and six at the dozen rate.*

**PACKING**—The prices quoted in this list do not include the cost of packing. In lots of 100 and up, the cost of packing amounts to about one cent per tree for fruit trees of ordinary size. Large ornamental trees, of course, cost more, and shrubs, roses, etc., much less.

**TRANSPORTATION**—In furnishing trees, etc., on the terms of this Price List we cannot be responsible for the accidents or delays of transportation. All articles after leaving the Nursery in good condition, are entirely at the risk of the purchaser.

**GUARANTY**—We honestly believe every tree which we send out to be genuine and true to label ; and we are willing, and hold ourselves ready in every instance where a variety does not prove to be the correct one, to refund the purchase money or replace the trees, free of charge to our customer; but beyond this we do not hold ourselves liable for constructive damages by reason of errors.

**OUR OFFICE**, Greenhouses and Nurseries are situated at the corner of Culver and Clifford streets, about three miles from the center of the city. (Roseview Post-Office.) We shall be happy to welcome our friends there, and if those intending to visit us will telephone to us before leaving the city we will meet them at the eastern end of the Parsells Avenue electric car line with carriage.

**TERMS CASH**, except by special agreement. On account of the perishable nature of the goods, *we decline to forward any orders C. O. D.*, unless accompanied by a remittance sufficient to secure us from possible loss.

Correspondence is invited from all those who are interested in purchasing or planting trees, either in *large or small* quantities.

Address,

W. S. LITTLE & CO.,

COMMERCIAL NURSERIES,

ROCHESTER, August, 1898.

ROCHESTER, N. Y.

### HEDGE PLANTS, ETC.

BOX—Dwarf, stocky plants .....	2 50	20 00
ARBOR VITÆ		
NORWAY SPRUCE { Different sizes—see pages 7 and 8.		
CAROLINA POPLAR—1 year, 4 to 5 feet .....		5 00

NOTE—We know of no tree that is so well adapted for making a quick screen. It is nothing unusual for a Carolina Poplar to grow ten feet in a single season. They should be planted about 18 inches apart and then cut to about a foot from the ground. Every year or two after they should be cut back almost as far. In a month they will regain their old height.

### HORNBEAM—(CARPINUS).

A very old hedge plant. In Europe the gardeners by interweaving the top branches make a hedge so stiff that a man can walk on top of it. One of the best plants for ornamental screens. See page 4.

ROSA RUGOSA—2 years, own roots, 2 feet .....	1 50	8 00
--	------	------

The only rose available in this climate for hedge purposes. The foliage is thick and rough, and is never attacked by insects. The flowers are red, white and pink, single and of large size, often measuring three or four inches in diameter. They bloom all summer long, the blooms being followed by very large and showy orange and red seed pods. We cannot too highly recommend this plant for low hedges.

PRIVET—CALIFORNIA, 12 to 15 inches. (See page 9.)

PURPLE BERBERRY—Different sizes. (See page 8.)
